REQUEST FOR INTERVIEW

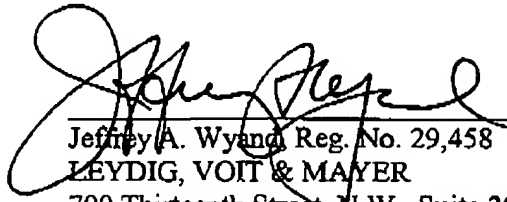

Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

In response to the Office Action dated June 4, 2003, Applicants respectfully request an interview with the Examiner. Applicants request the interview to accomplish the following:

- Understand the Examiner's position that delay gate movement necessitates deletion and reinsertion. By our understanding of computer automated design, data structures implementing delay gates are moved by instantaneously changing the X-Y coordinates of the data structure. Accordingly, the delay gate data structure is never absent from the circuit design. Therefore, we do not understand the Examiner's basis for the contention that delay gate movement inherently involves deletion.
- Ascertain the Examiner's response to arguments made by Applicants in the Amendment of March 21, 2003, to which the Examiner did not respond in the Official Action of June 4, 2003. Namely, Applicants argued that the alleged teaching of delay gate deletion in Li occurs before routing, not after routing as recited in the present claims. The Examiner made no rebuttal to Applicants contention.
- Ascertain the Examiner's view as to what amendments are necessary to bring the application into a form for allowance.

Respectfully submitted,

Jeffrey A. Wyand, Reg. No. 29,458
